

TRACK 3: DATA COLLECTION AND INTELLIGENCE SHARING - STATUS REPORT

Provided as a Reference to the Governor's Opioid State Action Accountability Taskforce.

Report Timeframe

From: 7/1/2018

To: 9/30/2018

Description

Data tracking, analyses, and reporting are tools to understand Nevada's opioid problems, to help target prevention efforts, and to focus efforts where they are most needed. Timely and high-quality data is critical to many of the activities taking place statewide.

Highlights

Many advancements to data collection and intelligence sharing have been accomplished, and improvements and developments are ongoing. Data is available to the public through several sources including:

- *Prescription Drug Monitoring Program – Impact Analysis of AB 474 (Report)*
 - <http://dpbh.nv.gov/Resources/opioids/DHHS-data/DHHS-Opioid-Data/>
- *Opioid Dashboard (Online, Interactive)*
 - <https://opiod.snhd.org>
- *Nevada Opioid Surveillance (Report)*
 - <http://dpbh.nv.gov/Resources/opioids/DHHS-data/DHHS-Opioid-Data/>

Completed Milestones

- Released first public-facing report of opioid trend data on select metrics in July of 2018
- Reviewed and monitored overdose reporting under AB 474 by hospitals
- Analyzed criminal history repository and analyzed data on the impact of Specialty Courts (Washoe County)
- Linked prescription drug use to fatal and non-fatal overdose through the PMP (Prescription Monitoring Program, also referred to as PDMP)
- Opioid-related hospitalizations and deaths reported and analyzed
- The WITS system moved from configuration to the testing phase, with several components being tested by selected users
- Progress made in the development of SAPTA's online licensing and certification system
- Documents and data sharing agreements have been signed with ODMAPS and level 2 access has been requested.

Milestones Anticipated in the Next Quarter

Description of Action Item	Progress
1) Onboarding and monitoring of ODMAPS	In progress
2) Continue to monitor and improve overdose reporting under AB 474 (NAC 441A) and the impact of AB 474 on prescribing patterns.	In progress
3) Work with Quest Diagnostics to obtain more granular data related to toxicology	In progress

Description of Action Item

Progress

-
- 4) ALiS (SAPTA's online licensing and certification system for the Bureau of Health Care Quality and Compliance) is expected to be rolled out in December for SAPTA services
-

Ongoing Tasks

Several opioid-focused data collection and surveillance projects are in progress. These include Overdose Reporting through AB 474; updates to the Prescription Drug Monitoring Program (PDMP) Impact Analysis of AB 474 to separate MAT drugs from other opioids; ODMAP (A pilot to provide real-time overdose surveillance in response to an overdose spike); and Nevada's Opioid Dashboard.

- Update, maintain and expand Southern Nevada Health District Dashboard
- Implement treatment capacity management tool and policy
- Assist and encourage non-funded programs to gather TEDS data
- Continue producing ad-hoc analytics and reports for stakeholders and for presenting in public forums
- Continue meetings and workgroups focused on collecting, maintaining, and analyzing data for tracking and surveillance purposes

Challenges and Recommendations

To support ongoing improvement, challenges that were identified are shared, along with suggested actions.

Changes to national standards around methodology are ongoing. *Suggested Action:*

- *Continue to make improvements as needed. These issues are ongoing, unavoidable, and maintainable.*

Overdose Reporting under AB 474 – NAC 441A are being received but with some quality/completeness concerns.

- *Continue to address issues of quality and compliance.*
 - *Education on what is reportable*
 - *Improve audit reports using hospital billing records*
 - *Disconnect between billing coding and EHR clinical judgment (Ex: "History of")*
 - *Issue letters to the hospitals for cases meeting the ICD10 codes mandated for report, and work with hospitals to identify discrepancies in cases being reported*
 - *Working with associations and stakeholder groups to address technical issues with reporting and providing technical assistance where needed*
 - *Establishing more automated reporting when possible*
