STATUS OF FEDERAL REQUESTS

Test Kits	<ul style="list-style-type: none"> HHS is adjudicating distribution of test kits nationwide in accordance with a reasonable burn rate. To date, health districts in Nevada do not have accurate burn rates due to the limited supply. In order to maximize potential fulfillment, Nevada is now requesting up to 5,000 test kits each week. CDC's International Reagent Resources (IRR) website is fulfilling reagent requests. Nevada has received 3,000 reagent kits and 4,000 test swabs from HHS. <p><i>Note: Test kits acquired by community organizations, hospitals, private labs and entities through purchase or donation cannot be tracked by the State of Nevada.</i></p>
PPE <i>(Personal Protective Equipment)</i>	<ul style="list-style-type: none"> Nevada received the 3rd and final push of PPE from the Strategic National Stockpile (SNS). Nevada is distribute PPE based upon the Regional Distribution System and population-based proportion. <p><i>Note: The State of Nevada stockpile inventory of PPE has been distributed to the 3 Local Health Authorities (LHAs) and rural counties on a needs-based and population-based proportion based on the 2018 Census Bureau estimates. As new shipments are delivered from federal agencies, they will continue to be distributed throughout the State.</i></p>
Other	<ul style="list-style-type: none"> Nevada requested a Federal Medical Station (FMS) asset from the federal government to support medical surge. Status is on hold pending availability of this

surge. Status is on hold pending availability of this limited resource nationally.

[APRIL 8, 2020] Governor Steve Sisolak signed [emergency directive 013](#) in order to slow the spread of COVID-19. This directive orders the following:

- Closures of:
 - Publicly accessible sporting and recreational venues that encourage social gatherings
 - Auto, furniture, home furnishing, and appliance showrooms
 - “Open House” or in person showings of renter occupied residences that are for sale. (Please note, there is no halting of RE sales)
- The directive also prohibits in-person worship services, including drive-in and pop-up services. Other methods, like live streaming, are allowed, but proper precautions must be taken by those performing or assisting in the services.
- The Nevada Occupational Safety and Health Administration (OSHA) will ensure that businesses continuing operations during the pandemic are providing accurate protection to their workers.
- Clarified that barbers and cosmetologists are not to provide in home services, punishable by disciplinary measures.
- Issued guidance to and directed essential businesses selling goods or services to implement measures to protect both their employees and patrons.
- Prohibited the use of self-serve operations in grocery stores and issued guidance to these essential businesses on safety measures to protect employees and patrons.
- Reaffirmed that violation of the stay on evictions, Directive 008, constitutes coercion, duress, or intimidation.

WHAT NEVADANS CAN DO TO HELP

BATTLE BORN MEDICAL CORPS

DURING THE COVID-19 EMERGENCY, CERTAIN MEDICAL LICENSING REQUIREMENTS ARE WAIVED TO ALLOW NEVADA TO ADD ADDITIONAL HEALTHCARE WORKERS INTO THE SYSTEM

[Sign up at ServNV.org](http://ServNV.org)

The waiver allows medical professionals who are trained and in a medical field, but are not currently licensed in Nevada are being asked to seek a waiver and sign up.

- Medical Doctors
- Physician Assistants
- Nurse Practitioners
- Advance Practice Registered Nurses
- Registered Nurses
- Licensed Practical Nurses
- Emergency Medical Technicians
- Advanced Emergency Medical Technicians
- Respiratory Care Practitioners
- Paramedics
- Pharmacists
- Pharmacy Technicians
- Medical Students
- Nursing Students
- Medical Laboratory Directors or Technicians
- Licensed or Certified Behavioral Health professionals

FACE COVERINGS HELP PREVENT SPREAD

While there is no consensus if masks can reduce individuals risk for contracting COVID-19, it is well established that even improvised homemade face coverings can control and reduce the spread of the virus from infected individuals.

Since transmissions may occur prior to the development of symptoms, face coverings can serve as a source of control for an individual who may be infected, but there are no substitutes for handwashing and aggressive social distancing. For more information, visit NVHealthResponse.nv.gov.

FACE COVERINGS

As the COVID-19 pandemic continues to impact our health care systems, both nationally and right here in Nevada, it has become increasingly important to slow the spread. In response to this, the State's medical experts have weighed in with information on how to protect ourselves and others with improvised face coverings.

U.S. STATE DEPARTMENT

LEVEL 4 – DO NOT TRAVEL

The Department of State advises U.S. citizens to avoid all international travel due to the global impact of COVID-19. In countries where commercial departure options remain available, U.S. citizens who live in the United States should arrange for immediate return to the United States, unless they are prepared to remain abroad for an indefinite period.

At present the Department of State is making every effort to assist U.S. citizens overseas who wish to return to the United States. As the Covid-19 situation develops, our ability to provide such assistance working with commercial airlines or arranging for evacuation flights may become more limited or even unavailable. In recent weeks, commercial airlines have significantly reduced flight schedules and countries have closed airports and borders with little advance notice. If you wish to return to the United States, you should make arrangements to do so now and contact the nearest U.S. Embassy or Consulate for assistance as needed. There is no guarantee that the Department of State will be able to continue to provide repatriation assistance and transportation options to the United States may be unavailable in the future. If you choose to remain overseas, you should be prepared to remain where you are for the foreseeable future.

U.S. citizens who live abroad should avoid all international travel.

CENTERS FOR DISEASE CONTROL

LEVEL 3 – AVOID NONESSENTIAL TRAVEL

- Widespread ongoing transmission of a [respiratory illness caused by the novel coronavirus \(COVID-19\)](#) is occurring globally.
- **CDC recommends that travelers avoid all nonessential international travel.**
- Older adults and people of any age with serious chronic medical conditions are at increased risk for severe disease.
- There may be limited access to adequate medical care in affected areas.
- US residents may have difficulty returning to the United States.
- Travelers should avoid contact with sick people and wash their hands often with soap and water for at least 20 seconds. If soap and water are not readily available, use an alcohol-based hand sanitizer that contains at least 60% alcohol.
- All international travelers should stay home for 14 days after returning from travel, monitor their health, and practice social distancing.
