GET TESTED COVID-19

Testing is crucial to help treat, isolate or hospitalize people who are infected. Testing also is important in the bigger public health picture on mitigation efforts, helping investigators characterize the prevalence, spread and contagiousness of the disease.

COVID-19 data and test results that include people who don't show symptoms ("asymptomatic") can provide a more accurate understanding of how the virus is spreading. Identifying asymptomatic cases provides information on how the virus impacts the communities in Nevada.

Expanding testing plays a major part in influencing the state's continuous adjustment of prevention and control measures. Additional testing gives officials the ability to inform Nevadans of their conditions, knowledge that could contribute to focused social distancing and further slowing community transmissions.

Testing location information is provided and maintained by [Castlight: COVID-19 Resource Center](#). (Locations are not endorsed or vetted by the NV Department of Health and Human Services.) Testing sites can be searched by specific location or county. For more information call Nevada 2-1-1. Call the testing site or your health care provider before you go for testing.

[Report incorrect information about testing sites here.](#)

Medicaid covers COVID-19 testing for most uninsured Nevadans. Most who are either uninsured or enrolled in a limited benefit Medicaid eligibility group may be eligible for coverage. There is no resource or income test for this group. In addition to being uninsured (enrolled in a limited benefit Medicaid eligibility category), individuals must be Nevada residents, a U.S. citizen, or have qualifying immigration status and provide a social security number to qualify. [Apply here.](#)

YOU CAN HELP SLOW THE SPREAD OF COVID-19.

**MAINTAIN PHYSICAL
DISTANCING**

**COVER YOUR COUGH
AND SNEEZE**

**THOROUGHLY WASH
YOUR HANDS FOR AT
LEAST 20 SECONDS**

**WEAR A FACE MASK
WHEN OUT IN PUBLIC**

**STAY HOME WHEN
YOU'RE SICK**

CONTACT TRACING

Help Nevada slow the spread & answer the call.

Contact tracing gives health officials the information needed to draw a road map of how COVID-19 is traveling throughout Nevada. This procedure aims to identify and alert people who have come into contact with a person infected. Your information will not be shared. The process begins at the point one of the health departments receives a positive lab report. If you get a phone call from a contact tracer, they will identify themselves and ask you for specific information.

The goals of contact tracing are:

- To interrupt ongoing transmission and reduce the spread of an infection
- To alert contacts to the possibility of infection and offer preventive services or prophylactic care
- To offer diagnosis, counseling and treatment to already infected individuals
- If the infection is treatable, to help prevent reinfection of the originally infected patient
- To learn about the epidemiology of a disease in a particular population

Contact tracing has been a pillar of communicable disease control in public health for decades.

Contact tracing involves:

- Interview infected people to identify everyone they had close contact with
- Collect data on each case (discuss initial symptoms, when they were most infectious, what they did on those days, who they interacted with for at least 15 minutes within 6 feet of each other).
- Follow-up with identified contacts and advocate they follow CDC health guidance.
- Notify contacts of their potential exposure and refer contacts for testing.
- Monitor contacts for signs and symptoms of COVID-19.
- Connect contacts with services they might need during the self-quarantine period.

Contract tracers will not ask for:

- Social Security Number
- Money
- Salary Information
- Bank, credit card, insurance or financial information
- Ask about your citizenship
- Offer to sell you a COVID test kit

COVID Trace App

A free, easy mobile app that gives health officials the information needed to fight COVID-19 in Nevada, without compromising your privacy.

COVID Trace is a contact tracing mobile app developed by the Nevada Department of Health and Human Services that uses a technology called the Exposure Notifications System from Google and Apple. The app exchanges anonymous information with other phones in your vicinity and can notify you if you've come in contact with someone who has tested positive.

- ✓ The app uses Bluetooth to exchange random codes with nearby phones.
- ✓ Every day, it checks a list of random codes from people who tell the app they tested positive.
- ✓ If it finds codes that match, the app notifies you that you've been exposed and explains what to do next.

How it works:

- ✓ Download the free COVID Trace app from the Apple or Android app store.
- ✓ Once you opt-in, the Exposure Notifications System will generate a random ID for your device. To help ensure these random IDs can't be used to identify you or your location, they change every 10-20 minutes.
- ✓ Your phone and the phones around you will work in the background to exchange these privacy-preserving random IDs via Bluetooth. This is a passive process that begins once you opt-in and functions without the app open.
- ✓ Your phone periodically checks all the random IDs associated with positive COVID-19 cases against its own list.
- ✓ If there's a match, the app will notify you with further instructions from the Department of Health and Human Services on how to keep you and the people around you safe.

Protecting your community. And your privacy.

With the COVID Trace app, you don't have to choose between your privacy and the health and safety of your community. The app was designed to protect and preserve your privacy. It doesn't use GPS and can't share your location or information.

No one will know:

- ✓ Your location, name or address
- ✓ Your health information
- ✓ Who you met
- ✓ Who tested positive

Download now for free.

Get your Flu Shot by Nevada Day

Getting a flu vaccine is more important than ever this year. All Nevadans 6 months and older are encouraged to get vaccinated by Nevada Day

It is the best protection against flu and can keep you and your loved ones out of an already overburdened healthcare system. It is especially important that child care workers are vaccinated to protect the children they care for. Children younger than 5 years old (especially those younger than 2) are at high risk of developing serious flu-related complications. Unvaccinated child care workers can unknowingly spread flu to children in their care, their co-workers, and their families.

The Nevada State Immunization Program encourages all Nevadans 6 months and older to get vaccinated by Nevada Day. For more information visit: [Resources for Child Care Workers](#).

Don't know where to go to get your flu vaccine? Whether you have health insurance or not, visit [Find a Vaccine Provider](#) for the calendar of events and flu vaccination clinics throughout Nevada.

Anyone can get the flu (even healthy people), and serious problems related to the flu can happen at any age, [but some people are at high risk of developing complications](#) if they get sick.

- This includes:
- Children younger than 5, especially under 2 years
 - Adults 65 years of age and older
 - Pregnant women (and women up to 2 weeks postpartum)
 - Residents of nursing homes and other long-term care facilities
 - People with chronic medical conditions (such as asthma, diabetes, or heart disease)
 - People with weak immune systems from disease or medication (such as those having chemotherapy for cancer)
 - American Indians and Alaskan Natives

The Nevada State Immunization Program is currently working to ensure COVID-19 vaccine distribution plans are in place to vaccinate frontline healthcare workers in Nevada.

The Trump Administration announced last week that CVS and Walgreens have been contracted to provide vaccination services to Long Term Care Facilities.

The Nevada Intertribal Council is contacting tribal partners across the state to seek their input on how each would like to receive vaccine allocation. Tribal jurisdictions have the option to receive vaccine from the state of Nevada or the federal government. [Take the Vaccine Allocation Survey Here.](#)

Battle Born Business Nominations

Recognizing businesses that enhance guidelines to stop the spread of COVID-19.

Watch out for whiplash when following the moves of this young company. Las Vegas-based Breakneck Gear went into business about a year ago and was in its infancy when COVID-19 happened. What started off as a company specializing in dye sublimation on sports uniforms quickly had to change directions when sports were closed down during the pandemic.

To stay in business, Breakneck Gear transitioned from uniform printing to mask making. "I understand why we have to make the masks and it is something that is needed. We want to support the community by making masks affordable," partner Mike Halvorson said. Making masks affordable and keeping staff safe is top priority. Anybody who comes into the warehouse has to wear a mask and maintain social distancing rules. The warehouse is 3,500 square feet and is limited to four people working at a time separated by at least 12 feet.

Only one seamstress is in the office and another seamstress works at home. Both wear rubber gloves and wear masks while working on the masks. As soon as the masks are completed they get packaged and sent directly to the client. "We are very lucky we had the opportunity to pivot our business and stay open to support our community," Halvorson said.

Pak Mail in Incline Village is sending safety and support to its customers. There is a limit of three customers with social distancing in place inside the facility. Masks are required for all employees and patrons. If a client forgets their mask they can remain outside and their mail and or package will be brought out to them. There are markers on the floor to illustrate social distancing protocols. Crowd control barriers have

also been installed to direct the flow of traffic inside the retail space. Acrylic shields have been installed for points of contact to protect both clients and employees. Also, to protect employees the store has limited hours to minimize one-on-one interactions.

Forms that customers can fill out prior to shipping are made available outside of the building. In addition, packages are delivered to customers outside when possible. "In times like these the most important thing is to come together as a community and at Pak Mail we are honored to provide our community with an essential service," owner James Conces said.

Pak Mail takes the responsibility of safely delivering mail and keeping its clients healthy very seriously. This facility definitely gets a stamp of approval for COVID-19 compliance.

Send nominations with a photo and description to: BattleBornBizNV@gmail.com.

My Coronavirus Story

Share your story, at: NVcovidStory@gmail.com

Nikki Haag, an outdoor loving mother of 3, contracted COVID-19 in June of 2020. Nikki was feeling fine and was going in for a medical procedure when she underwent a mandatory COVID-19 screening. She had just come back from a hike when she got the call, she was positive for COVID-19.

Nikki was not symptomatic but she went into quarantine. She sequestered herself in her guest house for 14 days. The rest of her family, her husband and 3 children tested negative for COVID-19. Nikki thought that this was very strange considering they do everything together as a family and are rarely apart.

A false positive was addressed and Nikki went into the doctor again to get tested. This time she was tested for the antibody in her blood. This test also came back positive and showed that Nikki was starting to shed the virus. Nikki was definitely positive for COVID-19 but she was still showing no symptoms.

To keep her family safe and herself from getting lonely. The family met nightly on opposite porches. "My husband would cook every night and we would sit outside, me on the guest house porch and my family on the main house porch and hang out."

When Nikki needed snacks or other necessities from the main house she would send messages to her family members and they would leave the needed items at the front door of the guest house.

"It is so hard to not be with your family when they are so close," Nikki recalls, " You just realize how important family is to you."

Nikki is now out of quarantine and reunited with her family. "I think it is good that medical facilities test for COVID-19 prior to procedures because it can be very dangerous if you have COVID-19 and undergo a procedure. These precautions are very important in today's climate."

Division of Public and Behavioral Health

Call 2-1-1 or visit nevada211.org for information and referrals to health, human and social service organizations.

Never in our history have we had an experience like COVID-19 that has connected us while we've had to stay separated and isolated. In response to this global pandemic, the Nevada Department of Health and Human Services has announced the Nevada Resilience Project, which encourages healthy coping and active management of stressors, building resiliency, and fostering compassion.

Our Resilience Ambassadors have been deployed statewide to support Nevadans coping with the effects of COVID-19. Resilience Ambassadors are working to ensure Nevadans have access to prevention and early intervention services. We understand the stress of working from home while having school-age kids, to feeling a sense of loss due to unemployment, the feeling of isolation, anxiety and disconnection, and the challenges of adapting. Our Resilience Ambassadors can provide support and connection to resources over the phone, through text and video-chat, or face to face. We also offer EN/ES Bi-lingual access to services, and are a free and confidential program. Know there is someone who understands and people who can help.

The Division of Employment, Training and Rehabilitation has launched a COVID-19 filing system for Nevada residents who have been affected by the pandemic to receive benefits. This is completely separate from filing; for traditional unemployment insurance benefits.

Extended Benefits Pandemic Emergency Unemployment Compensation (PEUC) & State Extended Benefits (SEB)

- For regular UI, after claimants have exhausted their 26 weeks of benefits, they may be eligible to apply for 13 weeks of PEUC benefits.
- The state is in testing to finalize the ability to offer 7 weeks of SEB to those who are eligible and have exhausted PEUC.
- Weekly PEUC and SEB benefit amounts are the same as UI weekly benefit amount.
- You cannot receive PEUC or SEB while receiving regular UI benefits.
- The SEB computer programming for the UI system is being completed and tested in October. Once the SEB module is activated, claimants' payments will be brought up to date.
- PUA eligibility is up to 39 weeks; SBE adds an additional 7 weeks which brings the PUA benefit total up to 46 weeks during the pandemic assistance period.

LOST WAGES ASSISTANCE (LWA)

The Lost Wages Program is funded by FEMA which provided grants to participating states to offer additional temporary benefits to certain individuals receiving unemployment benefits.

- DETR team is updating its computer programming in both the UI and PUA systems.
- Agency is still on track to be able to make the payments mid- to late-October (which falls at the end of the 4-6 weeks estimated).
- Because the award is a set amount based on projected need, and people can continue to apply for back weeks in both programs, DETR is planning to pay people in PUA and in UI a week at a time to be sure that they stay within our grant amount. Because the grant is a fixed amount, DETR will pay as many people as many weeks as they can.
- Claimants do not need to do anything to get the LWA funds, if they are eligible (getting at least \$100 in UI benefits, any amount in PUA).
- Nevada was approved for an additional \$199,134,642. Like all other states, Nevada will receive a set amount of funding to cover additional payments. Once that funding is depleted, the extra \$300 payments stop.

VIRTUAL JOB FAIR

Clark County Job Fair hosted by Nevada DETR in partnership with Jim Gibson and Tick Segerblom and Workforce Connections.

**Thursdays in October at 3:30 p.m.
Oct. 29 – Healthcare**
