COVID-19 CASES IN NEVADA

*As of 4/8/2020 cumulative daily death counts are displayed by date of death, rather than the date that the death was reported to the state. The total count for statewide deaths on the first tab may not equal the sum of the cumulative daily death counts because of cases where exact date of death is unknown or pending report.
WHAT NEVADANS CAN DO TO HELP

STAY AT HOME UNTIL MAY 15

It’s okay to get out and play, but please PLAY YOUR PART in doing so as safely as possible:
• 6 feet between yourself and others
• avoid shared equipment
• avoid gathering more than 10 people
• wear face coverings around others

NEED FOOD OR GROCERIES DELIVERED?
NevadaCAN helps older adults who are isolated at home during the COVID-19 pandemic

U.S. STATE DEPARTMENT

LEVEL 4 – DO NOT TRAVEL

The Department of State advises U.S. citizens to avoid all international travel due to the global impact of COVID-19. In countries where commercial departure options remain available, U.S. citizens who live in the United States should arrange for immediate return to the United States, unless they are prepared to remain abroad for an indefinite period.

At present the Department of State is making every effort to assist U.S. citizens overseas who wish to return to the United States. As the Covid-19 situation develops, our ability to provide such assistance working with commercial airlines or arranging for evacuation flights may become more limited or even unavailable. In recent weeks, commercial airlines have significantly reduced flight schedules and countries have closed airports and borders with little advance notice. If you wish to return to the United States, you should make arrangements to do so now and contact the nearest U.S. Embassy or Consulate for assistance as needed. There is no guarantee that the Department of State will be able to continue to provide repatriation assistance and transportation options to the United States may be unavailable in the future. If you choose to remain overseas, you should be prepared to remain where you are for the foreseeable future.

U.S. citizens who live abroad should avoid all international travel.

CENTERS FOR DISEASE CONTROL

LEVEL 3 – AVOID NONESSENTIAL TRAVEL

• Widespread ongoing transmission of a respiratory illness caused by the novel coronavirus (COVID-19) is occurring globally.
• CDC recommends that travelers avoid all nonessential international travel.
• Older adults and people of any age with serious chronic medical conditions are at increased risk for severe disease.
• There may be limited access to adequate medical care in affected areas.
• US residents may have difficulty returning to the United States.
• Travelers should avoid contact with sick people and wash their hands often with soap and water for at least 20 seconds. If soap and water are not readily available, use an alcohol-based hand sanitizer that contains at least 60% alcohol.
• All international travelers should stay home for 14 days after returning from travel, monitor their health, and practice social distancing.
